

## CIS 212: What is Cheating?

Please initial the following statements:

- 1) Sharing code for with another student is cheating / Using code from another student is cheating
- 2) Sharing code for old assignments with another student is cheating
- 3) Using previous solutions on the internet is cheating
  - a. This includes finding code on github
- 4) Hiring someone to do your code for you is cheating
- 5) There may be other types of cheating that aren't listed here. If you think you are in a gray area, then ask!!

You may:

- 1) discuss your code with others (highly encouraged)
- 2) if you are the helper, you may look at the helpee's code
- 3) BUT: If you are the helpee, you may **not** look at the helper's code

If I detect academic misconduct (cheating), all individuals involved will receive an F in the course immediately. Please note that if you are the one providing too much help, then you will also get an F.
